-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Kovacs et al.

Regarding claims 1 and 14, Kovacs discloses coordinating inter-network communications between at least two networks (Abstract, Fig. 1, multiple ad-hoc communication networks/logical MAHN that operate in a multimedia environment, wherein the devices are communicating between networks, page 2, paragraph [0018], page 4, paragraph [0042-0044]), that include providing a specific mode that defines the behavior of a node common to the at least two networks as being a node shared by the at least two networks (Fig. 1, a laser printer is a specific type(mode defining the printers characteristic to its neighbors) of printer that is a shared node between the second logical ad-hoc network and the third logical ad-hoc network, which utilizes IEEE 802.11 physical link (which also is a specific mode of communication associated between networks defining characteristic to neighbors), page 2, paragraph [0017], page 4, paragraph [0042-0044]).

***Allowable Subject Matter***

1. Claims 27-35 are allowed over prior art.
2. Claims 2-13, 15-26 and 36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
3. The following is a statement of reasons for the indication of allowable subject matter: Although the prior art teaches multiple ad-hoc networks internetworking among themselves wherein the architecture includes the ad-hoc networks sharing nodes they fail to teach or suggest a specific mode may skip a scheduled inter-network communication, and a mode that indicates that shared node should not be disconnected from the at least two networks that it is coupled to even though it has not participated in a scheduled inter-network communication session, exchanging meeting information between two nodes of the first network, whereby the participation by the first node in the first network includes the first node participates during a time period at, earlier than or later than the time slot.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Prenell P. Jones whose telephone number is 571-272-3180. The examiner can normally be reached on 9:00-5:30.
